## PERSONAL PROJECTS

### TODO APP (07/2023 - 07/2023)

- Simple to-do tracking application built to aid in productivity and time management by providing status updates in tasks and the ability to add, update and delete tasks in line with progress statuses. I leveraged HTML, CSS, javascript, REACTJS with Next and Firebase for the application, and git and GitHub for version control. Preview link : <https://todo-app-theta-ivory.vercel.app/>

### Shift Currency App (05/2023 - 05/2023)

- Shift Currency is an application built to aid in the exchange and transfer of money from one currency to another that is XAF, Dollars, and Euros. I used HTML, CSS, javascript and REACTJS for the application and Git and Github for version control. Preview link : <https://glistening-starlight-4bc726.netlify.app/>

### BrainBuster App (06/2023 - 06/2023)

- BrainBuster is an application that enable the user to undertake a series of questions to improve concentration, boost confidence and help retain information. I leveraged HTML, CSS, javascript and REACTJS for the application. Git and GitHub for version control. Preview link: <https://splendid-crostata-769cac.netlify.app/>

### Fooder App (05/2023 - 05/2023)

- Fooder is an application that provides recipes to the consumers based on the ingredients already available with them. I used HTML, CSS, javascript and REACTJS for the application and Git and Github for version control. Preview link: <https://gregarious-taffy-149553.netlify.app/>
